

November 2006

Dear Spirit AeroSystems Supplier:

Spirit AeroSystems, Inc., is strongly committed to improving electronic communication links with our supplier network. We have contracted with ESIS, an eCommerce outsourcing partner, to provide all eProcurement services for us. As we transition our suppliers from SSPN to our new SAP procurement system, we will also transition you to ESIS for your electronic procurement needs, expected to be on or about January 2, 2007.

Today, you are either receiving your purchase documents from us via Traditional VAN EDI or via Exostar SupplyPass. Through this partnership, we are able to offer two options for communication:

- Internet (Web) based transmission of data through ESIS' Harmony Order Management (HOM) system; or
- Traditional EDI through Value Added Network (VAN) connections.

You will receive purchase orders (POs) and change orders (COs), and if you are currently sending tangible parts, you will be expected to send Advance Ship Notices (ASNs). Several options will be provided for you to enable ASNs. If you do not send tangible parts, electronic invoices will also be an option. Later, you may be able to send PO and CO acknowledgements electronically as well.

The VAN solution accommodates those suppliers who are currently EDI capable, using a VAN to connect to us today, and want to remain in a pure EDI environment.

The ESIS Harmony Order Management (HOM) is an Internet (Web) based system for suppliers wishing a more manual option than VAN EDI. The HOM solution is offered to our suppliers at no charge. Spirit AeroSystems will pay all of the associated setup and ongoing maintenance costs with this Web based solution. The supplier will only have to pay for their PC/Internet costs.

A list of Frequently Asked questions is posted at <http://www.esisinc.com/support/spirit/> (under the Learning Center heading.)

Whether you prefer to use ESIS as your VAN to receive and send transmissions with Spirit AeroSystems, or use the ESIS HOM, **email your completed responses to the attached questionnaire to signups@esisinc.com or FAX to 858/625-0260 by December 1, 2006.**

To implement the HOM solution, you will need the following minimum equipment/software:

- 1) Personal computer
- 2) High speed modem
- 3) Internet account through any Internet Service Provider
- 4) Internet Browser (e.g. MSIE 5.0 and later, Netscape 4.7 and later, Opera 5.0 and later)

PRODUCTION is expected on or about January 2, 2007 for all HOM Suppliers. Training materials are available at <http://www.esisinc.com/support/spirit/> . You will be contacted after your POs are loaded into ESIS to provide userid, passwords, and training opportunities.

To implement the VAN solution, you will need:

- 1) EDI data maps; posted at <http://www.esisinc.com/support/spirit/> as soon as available.
- 2) You will be contacted by ESIS to begin EDI transmission testing, for those selecting the VAN solution, beginning December 1, 2006 for the following transactions:
 - 850 Purchase Order, 860 Purchase Order Change, 856 Advance Ship Notice, 810 Invoice, 824 Invoice Exception (861 Material Receipts, 855 Purchase Order Acknowledgement, 865 Purchase Order Acknowledgement to be added later)

PRODUCTION is expected on or about January 2, 2007 for all VAN EDI document transmissions listed above in ESIS Version 4010.

Spirit AeroSystems is committed to reducing the cost and improving the speed for exchanging information with our suppliers. We strongly encourage you to sign up with ESIS as soon as possible to make this transition seamless for you.

As always, we are confident that we will be able to count on your cooperation to make this transition a smooth and successful one. If you have any questions, please contact ESIS at (858) 625-0060 between 5 a.m. and 5 p.m. (PST) Monday through Friday, or e-mail signups@esisinc.com. You may also call the Spirit AeroSystems Project Managers for more information, Kathy Bridges, at 316-526-6699 or kathy.bridges@spiritaero.com or Larry Bakula at 316-523-2312 or Lawrence.m.bakula@spiritaero.com .

Sincerely

Jim M. Urso
Vice-President, Supply Chain Management
